

Andy Anderson

For County Commission, District 5

LEADERSHIP:

Andy believes that the meaning of leadership is to be responsive to your constituents: answer their telephone calls and e-mails, attend neighborhood and other meetings where the people (not just the politicians) congregate. It means doing your homework and understanding the complexity of the issues in order to make good decisions.

ACCOUNTABILITY:

Andy lives by the words of our Founding Fathers - We The People. Elected officials are a part of, not apart from, the people. This means that our Brevard County Commissioner has to be sure to make informed and principled decisions and then stand by them. It is time to change from a Commissioner who is accountable only to big business and special interests to one who is accountable to the people.

ECONOMY:

Being a small businessman, Andy believes that small and locally owned businesses are the backbone of a sustainable economy. Andy has always worked to ensure fairness and a level playing field for all businesses. We need a sustainable economy with family wage jobs. Through re-prioritizing our commitment to people and essential government services, we can create long-term economic security. It's time for our County Commissioners to repair the long term damage produced from short-term thinking.

HEALTH AND PUBLIC SAFETY:

Andy supports good public health and safety policies. Funding Police, Fire, and Ambulance is, and has always been, a main concern for Andy. He plans to prioritize the issues of public safety: ensuring that the funds spent on the public safety system translate into an effective response to the people.
